

Tube Feeder

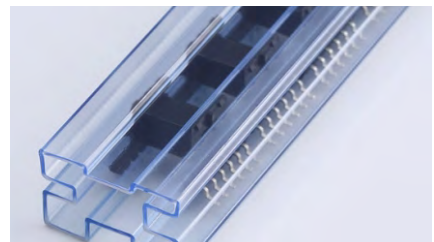

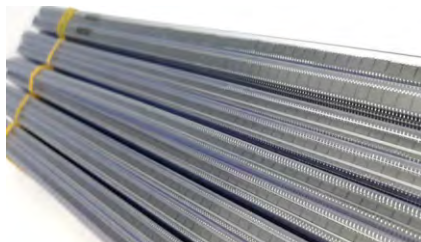

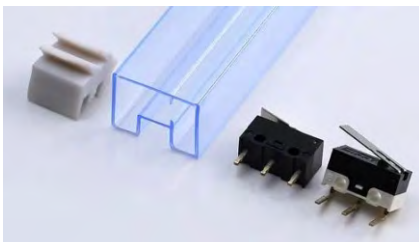

FUNCTION DESCRIPTION

The tubular material feeder is used to feed special-shaped electronic components packaged in plastic tubes to the plug-in machine quickly and smoothly, and replacing the plastic tube will not affect the feeding efficiency.

- The pipe material slides down 45° and is automatically divided.
- Automatic detection of discharging end materials

Model	Feeder Width	Maximum material size	Tube length	Discharge Speed
M7108850 - 04	40mm	70*28*34mm	≤600mm	80pcs/min
M7108839 - 05	60mm	70*43*38mm	≤600mm	80pcs/min
M7110347 - 03	80mm	70*60*38mm	≤600mm	80pcs/min

ADAPTIVE COMPONENT

Tubing material
